HONEST LITTLE APPS / BOOKINGSOLVED

Can this appointment move?

Keep the original time visible while you test a replacement. Use local times and a booking reference instead of a client name. No calendar changes happen here.

1 Keep the original on record

Existing date, start and finish

Booking reference (optional)

Requested date

Service minutes

Cleanup minutes

2 Test two proposed starts

Earliest start is when the previous booking and its cleanup finish. Finish the new service and its cleanup by the next commitment. Equality fits; overlap does not.

Earliest available start

Next fixed commitment

Proposed start	Service ends	Cleanup ends	Fits?

Worked example

A Tuesday 09:00 booking is being moved to Thursday. Thursday opens at 14:15.
Next booking starts 15:15. Service: 40 min. Cleanup: 10 min.
14:20 + 40 + 10 = 15:10 (fits). 14:30 + 40 + 10 = 15:20 (5 min too late).

3 Close the loop

Record the state: offered / accepted / declined / still checking. Check the live calendar again before changing anything. If the move is accepted, record when the old slot closes.

Decision, agreed replacement, and what happens to the original
