Beyond quarter hours

A printable self-check for reading hours and minutes as decimal hours.

Whole hours + (minutes / 60) = decimal hours

Every 6 minutes is 0.10 hour. Keep the two formats labelled.

1. Convert each duration

Write the decimal hours. All eight examples convert exactly.

A. 4 h 06 min _____

B. 2 h 12 min _____

C. 5 h 18 min _____

D. 6 h 24 min _____

E. 3 h 36 min _____

F. 7 h 42 min _____

G. 1 h 48 min _____

H. 8 h 54 min _____

2. Read the decimal backwards

Multiply the decimal part by 60 to find the minutes.

I. 6.10 hours _____

J. 2.40 hours _____

K. 1.70 hours _____

L. 5.90 hours _____

3. Total three fictional durations

4 h 06 min + 6 h 24 min + 8 h 54 min

M. Total minutes _____ N. Hours and minutes _____

O. Decimal hours _____ Show the conversion below.

Check the reasoning

Use the answers to spot which step needs another look.

Whole hours + (minutes / 60) = decimal hours

Every 6 minutes is 0.10 hour. Keep the two formats labelled.

Forward conversions

A. 4 + 6/60 = 4.10 hours

B. 2 + 12/60 = 2.20 hours

C. 5 + 18/60 = 5.30 hours

D. 6 + 24/60 = 6.40 hours

E. 3 + 36/60 = 3.60 hours

F. 7 + 42/60 = 7.70 hours

G. 1 + 48/60 = 1.80 hours

H. 8 + 54/60 = 8.90 hours

Reverse conversions

I. 6.10 hours = 6 h 06 min

J. 2.40 hours = 2 h 24 min

K. 1.70 hours = 1 h 42 min

L. 5.90 hours = 5 h 54 min

The three-duration total

246 + 384 + 534 = 1,164 minutes (M)

1,164 minutes = 19 hours 24 minutes (N)

19 + 24/60 = 19.40 decimal hours (O)

Cross-check: 4.10 + 6.40 + 8.90 = 19.40 hours.

Keep the source format

Read the column label before using a number. Retain the original minutes when a conversion repeats, and follow the documented rounding convention.
